

**Company:**

TMC Transportation

Established:

1972

Overview:

TMC is one of the largest employee-owned flatbed trucking companies in the United States. With over 40 years in the flatbed industry, no other carrier has a stronger flatbed freight base or better reputation for delivering excellent service. If you are looking for a flatbed driving job... drive for the best!

A TMC driver is an individual who wants to be a member of a team that strives to be the best at everything it does. TMC drivers are proud that people all over the country know us by the cleanliness and sharpness of our fleet, even if they have never interacted with a truck driver. The quality of TMC's drivers, equipment and service keep the best customers coming back to us day after day.

We have high expectations for our drivers and we want drivers who have high expectations for us. We offer our drivers their choice of two pay programs, great benefits, opportunities for advancement and late model Peterbilt tractors. At TMC home time is of utmost importance and it's the foundation for which our entire business model was built.
